4 September 1964

MEMORANDUM FOR THE RECORD

SUBJECT: Trip Report

PLACE:

[Redacted]

25X1

DATE: 2 September 1964

ATTENDEES:

[Redacted]

25X1

The main purpose of the trip was to deliver the oblique imagery and the Zeiss 5x eyepieces for their use while developing the Variable Ratio Anamorphic Eyepieces. Concerning the contract the following topics were discussed:

1. The eyepieces will have a 3 to 1 anamorphic zoom range and will achieve the unit value.
2. The lenses have been achromatized.
3. The eyepieces should weigh about 1.5 pounds each.
4. [Redacted] will furnish an instruction drawing and a test and adjust notice.
5. They estimate that at least 50 units would have to be manufactured to justify tooling costs.
6. The working drawings will be furnished at the end of this week and fabrication will begin next week. They still maintain 15 November 1964 as the delivery date.
7. No other technical modifications have been made since the last visit. A work statement should follow within two weeks.
